Cosmetic sample for lipstick, eye shadow, manicure, lotion or hair tonic
- comprises moulded addn. room temp. vulcanising silicone rubber with
semi-transparent appearance and colourant, for easy tuning

A cosmetic sample is moulded, using addn. room temp. vulcanising
silicone rubber and a colourant. The addn. room temp. vulcanising
silicone rubber has (semi)transparent appearance.

USE

The cosmetic sample is used in a lipstick, eye shadow (stick), eye
brown pencil, lip cream, foundation stick, blusher, nail polish, (milky)
lotion, cream, or hair tonic.

ADVANTAGE

Easy toning and prodn. are applied to the cosmetic sample. The
use of the specific silicone rubber provides the cosmetic sample with
Réf. 96-297128 [30]

high quality texture and durability.

PREFERRED COLOURANT

An (in)organic pigment, dye, pearl agent, resin or surface-treated
(silicon- or Teflon-treatment)-pigment, or composite powder (silica-
coated iron oxide), are used as colourant.
